

## CONSERVATION TIPS OUTDOOR IDEAS:

Set mower blades high. Grass that is 3 inches tall encourages longer, healthier roots, withstands the heat better and requires less watering.

Cut small amounts (one third of the grass blade length) off the grass at a time. Leave the clippings on the lawn to provide moisture to the lawn.

Your lawn does not need to be watered every day. A good soaking once a week is perfect for a healthy lawn. Grass beginning to turn brown during dry conditions has become dormant and will revive after normal rainfall.

Reset automatic irrigation systems to meet the changing Village water status and after power outages.

Install a rain sensor or smart controller device on automatic irrigation systems.

Aim sprinklers to only water plants, not the sidewalks, driveways, or streets.

Drip irrigation systems are effective for watering plants without wasting water.

Use mulch around trees and plants to retain moisture.

Use a rain barrel to capture rain water and use this to water plants.

## WATER SYSTEM STATUS

The water status regulates the use of outside water for the purposes of watering landscape material. Watering is strictly enforced. To check current water system status, see signs posted on main streets in the Village, call (847) 658-2700, or look on the Village's website [www.algonquin.org](http://www.algonquin.org).

### CONSERVATION

Green signs indicate outside water use is permitted except for watering landscaping and lawns, which is prohibited between the hours of 9:00 am and 6:00 pm.

### EVEN/ODD

Yellow signs indicate even/odd days for watering before 9:00 am and after 6:00 pm. Even addresses may only water on even calendar days and odd addresses may only water on odd calendar days, before 9:00 am and after 6:00 pm.

### EVEN/ODD 6:00-9:00 AM

Orange signs indicate even/odd days for watering only between the hours of 6:00 am and 9:00 am. Even addresses may only water on even calendar days and odd addresses may only water on odd calendar days from 6:00 am to 9:00 am.

### RESTRICTED

Red signs indicate no outside water use is allowed at any time. This includes all use of water outside, such as washing vehicles, power washing, and watering landscaping.

## CONSERVATION TIPS HOUSEHOLD IDEAS:

Turn off the water while brushing your teeth and shaving (you conserve up to 9 gallons of water per brushing).

Toilets use 5-7 gallons with each flush. Install a displacement device to conserve water. This is as simple as placing a plastic bottle filled with water in the tank. This will conserve about 1-2 gallons per flush.

Check for leaks and fix them immediately. A small leak can waste a lot of water and cost you money.

Wash only full loads of dishes and clothes.

Take a short shower instead of a bath; this saves about 15 gallons.

Keep a pitcher of water in the refrigerator instead of running the tap until water is cold. This simple step saves about two gallons per glass.

Install water efficient showerheads, toilets, and appliances.

Collect water used to rinse produce and use it to water house plants.

Use the garbage disposal sparingly, compost instead.

## STATUS CHANGES

The water system status is anticipated to change to “Yellow Status” at the beginning of June. The status may change throughout the summer depending on weather conditions and water usage. Please watch the signs for the status change, call Ganek Municipal Center (847-658-2700) or look on the Village website ([www.algonquin.org](http://www.algonquin.org)).

## WATER RESTRICTIONS STRICTLY ENFORCED

The Village has a zero tolerance policy. If you are watering illegally, you will be issued a ticket and fined \$100.00 for the first offense. Village employees are authorized to enforce water regulations at all times.

## SURCHARGE RATES

Surcharge rates are in effect year round. Billing rates are tripled for water consumption over 20,000 gallons per month. The billing rate will appear on the water bill as Conservation Surcharge. Check your water bill to see what your average consumption is, or check your water meter to monitor water consumption levels.

“Every Drop Counts!”

## VILLAGE OF ALGONQUIN WATER CONSERVATION REGULATIONS

April 2017

The Village of Algonquin continues to take a pro-active role in the conservation of water. The overall goal of the water conservation program is to educate residents and businesses about the ease of conserving water and the importance of conservation. Water is a valuable natural resource that cannot be taken for granted. Algonquin relies on underground aquifers (lakes) to supply all of our drinking water. It is critical that the amount pumped out of these aquifers is kept under control to ensure that there is enough water for everyone, now and in the future. In order to ensure water quality and quantity, we request all residents and businesses to join our efforts to protect and conserve water. The Village regulations are explained in this pamphlet as well as conservation tips you can practice at home. Thank you in advance for your continued efforts to reduce the amount of water consumed in your home and/or business all year.

“Every Drop Counts!”
