

VILLAGE OF ALGONQUIN RESIDENTIAL WATER SERVICE INSTALLATION REQUIREMENTS

ALL INSTALLATIONS SHALL BE DONE UNDER THE RULES OF
THE ILLINOIS STATE PLUMBING CODE

1. A thermal expansion tank is required at the water heater.
2. Back flow protection shall be installed at the water feed to boiler, at all hose connections, and any other equipment requiring backflow protection.
3. "B"-box shall be installed in the parkway (Village right of way).
4. "B"-box is not permitted in the sidewalk or driveway.
5. Water meter must be located in an accessible area, and connected to a remote water reader (Contact Public Works Department for information regarding the remote phone reader).
6. All water lines shall be protected during backfill.
