Spella Southwest Fen Restoration

Project Information

The **Spella Southwest Fen Restoration** project will restore the southwest headwaters of the Spella wetland, and remove invasive species around the tennis courts in order to reduce stormwater runoff and assist with groundwater infiltration.

Work Area: Spella Park, located at 2610 Harnish Drive.

Project Schedule

Construction Year: 2023

Project Details

- Removal of invasive tree and shrub species.
- Planting of native prairie, wetland, and savanna species.
- Maintenance of the sites under the Village's natural area maintenance program.
